DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hanging of the dispenser in a shower must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restriction

2. Applicant's election of invention II without traverse on 1/12/2007 of the restriction requirement mailed 10/12/2006 of the restriction requirement in Paper No. 5 is acknowledged and made final.

3. Claims 43-45 and 46 respectively separately submitted and separated in the image file read on non-elected invention 1. Claims 1 and 17-36 and 43-46 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim(s) 38-42 is/are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhinegold 3270938 in view of Yarung et al. 53375928 wherein the Rhinegold discloses:

(Re: cl 37) A method of providing tissues in a shower stall comprising the steps of:
A) providing a body forming a tissue dispenser having a tissue dispenser section containing tissues to be dispensed and a disposal section for receiving used tissues, the tissue dispenser section being separated from the tissue disposal section by a wall and having a tissue dispensing orifice, the tissue disposal section having a tissue disposing orifice, a portion of the body defining the tissue disposal section being expandable from a collapsed state to enlarge the tissue disposal section (c 2 L 64-c3 L 20),

Art Unit: 3653

C) expanding the tissue disposal section to provide space for used tissues (c2 L 46–c3 L 19);

D) removing tissues through the tissue dispensing orifice; and

E) inserting used tissues into the tissue disposal section through the tissue disposing orifice (c1 L 19-43)

(Re: cl 38) wherein the portion of the body defining the tissue disposal section includes a pleat extending completely around the periphery of the body; step C comprising expanding the pleat (c2 L 46–c3 L 19)

(Re: cl 39) wherein the portion of the body defining the tissue disposal section includes a plurality of the pleats arranged in accordion fashion, each pleat extending completely around the periphery of the body (34a);

step C comprising periodically expanding the pleats as the tissue disposal section becomes full of used tissues (c2 L 46–c3 L 19)

(Re: cl 40) wherein the expanding of the tissue disposal section occurs in a vertical direction (c2 L 46–c3 L 19).

The Yarung et al. discloses any elements not inherently taught by the former including:

B) mounting the body at the shower stall above floor level(c1 L 9-34);

(Re: cl 41) (41) wherein step B comprises suspending an upper portion of the body by an elongated element (c2 L 38-45)

(Re: cl 42)(37) wherein step B comprises suspending an upper portion of the body by an elongated element (c2 L 38-45).

It would have been obvious for Rhinegold to suspend the dispenser in a shower using an elongated element to give shower users access to dry-protected-cleaning tissues and wipes for localized cleaning and to give shower cleaners a cleaning tool in the shower suspended above the wet floor or tub as taught by Yarung et al. and come up with the instant invention.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
